Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "said pad" in line 6 of claim 1 is assumed to be same as the cold sink in line 4.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kim (DE 19905199, English translation provided).

Kim discloses electronic massaging device. Referring to Fig.1, the device comprises a handle 40 accommodating a rechargeable battery 50, thermoelectric component 3, first conductive plate 4 mounted on one side of the thermoelectric component 3, second conductive plate 5 mounted on the other side of the thermoelectric component 3 and a switch 42. The first plate 4 is installed on the front part of the device 1 with a front surface touching the body and with a backside touching the thermoelectric component.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu (JP2001-190586 with US equivalent 6,679,908).

Shimizu discloses facial heating and cooling device as shown in Figs.1-3. The device comprises thermoelectric element 12, heat conductive element 11 attached to one side of the thermoelectric surface 12a, heat conductive element with fin 13 connected to the other side of the thermoelectric surface 12b and a switch 100.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (DE 19905199) in view of Saringer (U.S. Patent Number 5,628,769).

Kim discloses the invention substantially as claimed. rechargeable battery and cells battery are equivalent replaceable parts. However, Kim does not disclose foldable handle. Saringer discloses a foldable handle in the same field of endeavor for the purpose of pivot-attached handle and head. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the apparatus of Kim with a foldable handle in view of Saringer so as to improve mobility.

The applicant should also note that a change in the shape of a prior art device is a design consideration within the skill of the art. In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
